Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

## Response to Arguments

Applicant's arguments filed 3/22/2011 have been fully considered but they are not persuasive.

Applicant argues that the Examiner is identifying "display size" of Murata as the claimed "pitch between dots." The Applicant also argues that because Murata always performs the adjustment, and that the instant application performs the adjustment in a specific situation.

The Examiner respectfully disagrees with Applicant's arguments.

First, the Examiner stated that the pitch between dots is implicit when given the display size and resolution, not that the display size and the pitch between dots are the same thing. Therefore, because both displays in Murata have the same resolution, but different sizes, Murata is, in effect, comparing the pitch between dots.

Second, the claims do not preclude making an adjustment when pitch between dots of the receiver is less than the pitch between dots on the sender side. The claims only states that an adjustment is made when the pitch between dots is greaten on the receiver side than on the sender side. Therefore, because the claim is silent as to whether an adjustment is made or not made when the pitch is less on the receiver side, the fact that Murata may perform an adjustment in such a situation is irrelevant.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dillon Durnford-Geszvain whose telephone number is (571) 272-2829. The examiner can normally be reached on Monday through Friday 8 am to 5 pm.

Application/Control Number: 10/567,521 Page 3

Art Unit: 2622

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
